

Data Protection for Web Hosting and Domain Registrars

Welcome to this essential course on Data Protection for Web Hosting and Domain Registrars. This course is designed to equip the Truehost team with vital knowledge about Data Protection and ensure compliance with the Kenya Data Protection Act of 2019, specifically in relation to web hosting and domain registration services.

Throughout this course, we will be using Truehost as our primary example for demonstration purposes, making the content directly applicable to our daily operations.

Objective: To provide you with a comprehensive understanding of Data Protection as it applies to our industry, ensuring that we maintain the highest standards of compliance and security in our services.

Target Audience: This course is specifically tailored for the Truehost Team and anyone else within the company.

Prerequisites: To get the most out of this course, participants should have:

- Familiarity with Truehost's hosting and domain services
- Basic knowledge of web hosting operations
